## Velvet Black

Bold and evocative, it can be used as an accent color against a background of neutrals. Paired with a richer palette of slates and plums the tactile finish reveals its sensual side.

## Moon White

Pure and minimalist, these glossy white faucets are destined for architectural environments, where their cool looks can be fully appreciated.

# Veris

20 180 LSO  
3-hole basin mixer

Refined and pure, the Moon White finish adds vitality the sculptural lines of Veris.

In Velvet Black the chrome accents draw the eye to the functionality of the 'Joy Lever' – accentuating the transition from the faucet body to the handle.

However, it is not just the fun factor that makes this product so enjoyable. Veris is unique – from the attractive lever via the flat spout through to the cylindrical body.

To make it even more sophisticated, its hinge is enclosed by a decorative chrome ring.

The graphic silhouette of Quadra's lever handle is enriched by the Velvet Black finish – its open shape highlighted by a band of sparkling chrome.

In contrast, glossy Moon White enhances its modernist appeal.

The name of this designer fitting, Quadra, is derived from the German word "Quadrat" for "square", the design combines both square and cylindrical shapes in an emotional and soft geometry for a perfect Cosmopolitan style.

The square-shaped base supporting the faucet body recalls the shape of the lever and ensures an aesthetic transition to the washbasin.

All models showcased at this catalogue are also available with chromed finish.

### Paul Flowers

#### GROHE Senior Vice President of Design

Producing inspirational design concepts with his talented in-house team, has resulted in a number of impressive worldwide design awards for GROHE including iF and Red Dot. Paul made his way into the prestigious “40 under 40” list which recognizes the top 40 European creatives. Paul was recently appointed to the renowned iF jury of 25 international design experts.

## Design Signature

## GROHE Technology

GROHE products are designed to last a lifetime. Before being approved for use in production a new surface finish, such as the wet-painted lacquer finishes: Moon White and Velvet Black, must meet stringent internal quality requirements. CORROSION, ADHESION, ABRASION TESTS and quality control carried out by the Material and Process Technology laboratory, ensure that GROHE faucets and fittings retain their pristine looks, even after years of daily use.

GROHE SilkMove®

Our unique cartridges are manufactured in-house from an advanced ceramic alloy, and coated with a Teflon lubricant. As a result, GROHE SilkMove® technology ensures a lifetime of maintenance-free comfort and reliability, while an extra generous operating angle means that temperature change from hot to cold is a smooth, gradual and precise process.
